

TRUECHART 4EXCEL

Excel is the most used Business Intelligence tool in the world. TRUECHART enables all Microsoft Office 365 users in your company to benefit from the strongest data collaboration solution.

TRUECHART4EXCEL is an Excel based Add-In which allows to create standardized, information-rich and collaborative visualizations inside your preferred spreadsheet-based program.

Enhance your finance, sales or marketing reports to transport information in an understandable way by applying the International Business Communication Standards (IBCS®) and choose from a variety of charting, commenting and layout functions.

Use the TRUECHART service to profit from an enterprise wide standard that can be updated or altered by one click pushing the effect to all TRUECHART Add-Ins. While being connected to the TRUECHART service, comments and collaboration functions will be user specific, enhancing the data literacy inside your spreadsheets.

Choose from different visualizations while using one Add-In

- Time Chart
- Structure Chart
- Table
- Small Multiples

VISUALIZATION & COMMENTING

Still using e-mails to collaborate and sharing insights? Try commenting in TRUECHART

- Use Title or Subtitle to send a clear message to the report audience
- Create tables with inline comments based on the values you choose
- Perspective comments give you the chance to annotate your charts
