

TRUECHART 4POWERBI

Power BI is a leading Analytics and BI platform. TRUECHART enables all Power BI users in your company to benefit from the most powerful data collaboration solution.

Explore TRUECHART4POWERBI and extend the possibilities of your Power BI reports. This custom visual gives you the chance to design your reports tailored to your needs.

Choose from a variety of charting, commenting and layout functions. Once your design is finished, save it as a template and speed up the future design process throughout your company.

Use the TRUECHART service to profit from an enterprise wide standard that can be updated or altered by one click pushing the effect to all TRUECHART visuals.

While being connected to the TRUECHART service, comments and collaboration functions will be user specific, enhancing the data literacy bringing your Power BI environment to the next level.

VISUALIZATION & COMMENTING

Still using e-mails to collaborate and sharing insights? Try commenting in TRUECHART

- Use Title or Subtitle to send a clear message to the report audience
- Create tables with inline comments based on the values you choose
- Perspective comments give you the chance to annotate your charts
