

# TRUECHART 4QLIKSENSE

Qlik Sense represents the new generation of Analytics. TRUECHART enables all Qlik Sense users in your company to benefit from the strongest data collaboration solution.

Today businesses need the ability to instantly discover important insights and to be able to rapidly take informed and data-driven action. TRUECHART is designed to do exactly this for businesses where consistency of reporting key financial information is critical. TRUECHART reduces the time required both to prepare reports, and also for the consumer to review and understand the content being presented. This is achieved by full enablement of the International Business Communication Standards (IBCS®) in any corporate environment.

Creating and displaying data using IBCS® within your BI results in uniform data visualizations that offer dynamic, meaningful reports giving your business a valuable strategic advantage.

Explore TRUECHART4QLIKSENSE and extend the possibilities of your Qlik Sense environment. With this extension you will be able to go a step further and break out of the sheet layout. Building upon a grid-based layout, TRUECHART lets you design your reports and dashboards without boundaries.
