

# KPI-Chat brings data collaboration to the next level

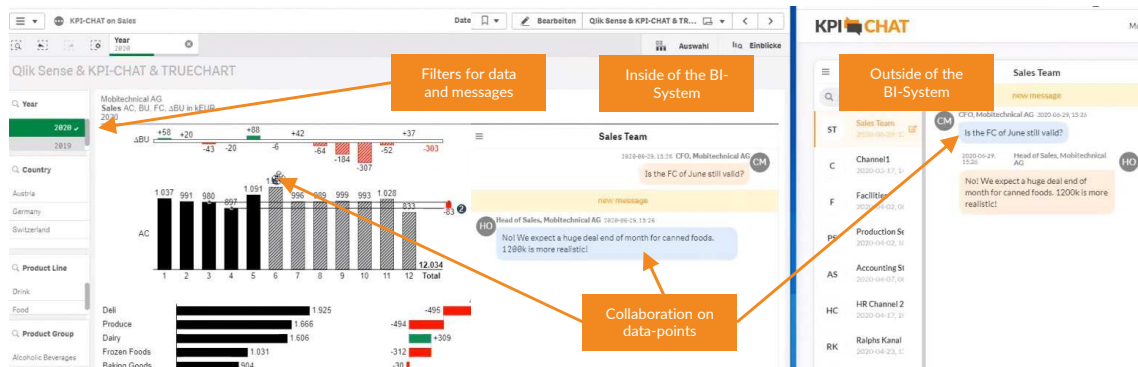

## Fast. Clear. Better.

Bring actionable insights back to your Business Intelligence and Analytics Platform by integrating communication where it belongs: directly with the data.

Nowadays, tools focus on performance, enhanced possibilities regarding Analytics and bringing the right information to the right people – which is an awesome development! But in the end, that is where the magic stops: screenshots are taken and enriched, report pages are printed, or data is extracted to answer questions and sharing important insights to the management – effectively breaking the platform ...

## As simple as „WhatsApp“

KPI-CHAT enables knowledge workers to communicate where insights are valued most – within reports and dashboards - by enriching analytical results and delivering actionable insights.

### Data focused collaboration

- Filters determine channel content
- Intuitive usage
